- ✓ Kidney Failure
- ✓ Urinary Tract Infection
- ✓ Blood in Urine

Check Your Dog's Health Today!

Ideal for Aging & Overweight Dogs

60 Second Testing

Easy to Use

Checking is caring. So CheckUp.

CheckUp

A quick, simple and reliable testing method to give you an overall picture of your dog's wellness through at-home urine testing.

CheckUp can detect the most common issues among domestic dogs including high glucose levels, kidney failure, urinary tract infection (UTI) and blood in the urine. By using CheckUp, you can detect a health condition in time to prevent health deterioration and improve your dog's lifespan.

Don't wait!
Wellness exams are one of the best ways to monitor your dog's health and to catch common problems before it becomes too late.

How did dogs and humans become best friends?

Dogs and humans have been caring for each other for more than 25,000 years. Derived from wolves, the social and emotional creatures quickly became companion dogs to help with hunting and protection. Since then, dogs have become "man's best friend." Identifying critical conditions in time ensures your dog will remain your friend for years to come.

In the Box

1 x telescopic pole (11" / 23 cm.)
1 x detachable metal ring
1 x disposable cup

2 x identical testing strips
*Repeat test with second strip if necessary

1 x sample collection vial

1 x sample collection pipette

Benefits

Noninvasive and stress-free

Fast and easy assembly

Biodegradable & recyclable

Obtain a clean, uncontaminated sample

On-the-spot test results for 4 conditions

Recommended by top veterinarians!

- Keep away from children.
- If one of the parameters tests positive, contact your veterinarian for further examination and treatment.

- For in vitro diagnostic use in animals only.
- CheckUp should not replace a periodic visit to a veterinarian.

- Avoid contact with eyes.
- Wash hands after conducting urinalysis.
